Summary

Frontend Engineer with 7+ years of commercial experience building scalable, high-performance web applications with React and TypeScript. For the last 3 years, building the World of Tanks web ecosystem at Wargaming; before that, B2B and B2C SaaS platforms serving 5M+ users. Strong in frontend architecture, performance optimization, legacy modernization, design systems and accessibility, with a full-stack background in Node.js and PostgreSQL. Works daily with AI coding agents (Claude Code, Codex), delivering 3x more work while personally owning code quality and architecture decisions.

Experience

Frontend Engineer — Wargaming (World of Tanks)

Dec 2023 – Present · Belgrade, Serbia *Hired full-time in Jan 2026 (on-site) after 2 years as a contractor through MSOFT (remote).*

- Build and optimize frontend applications in the World of Tanks web ecosystem with React and TypeScript, focusing on scalable UI architecture, performance and reliable backend integration.
- Improved frontend load time by 10% by optimizing reusable React/TypeScript UI components and rendering performance in a high-traffic production environment.
- Improved performance and maintainability through profiling, targeted optimization and modern ES6+ patterns.
- Integrated REST APIs and built reliable frontend–backend communication for production applications.
- Maintain the design system and accessibility standards across large-scale frontend applications.
- Increased personal delivery throughput 3x by building an AI-assisted workflow with Claude Code and Codex for component scaffolding, refactoring, unit test generation and pull request pre-review, with manual verification of all AI-generated code.
- Own features end to end, from prototyping and architecture to testing and deployment, with designers, backend engineers and QA in an Agile team.

Frontend Developer — Alar Studios

Apr 2022 – Dec 2023 · Budva, Montenegro

- Built and scaled B2B and B2C SaaS platforms serving 5M+ users with React, TypeScript and a reusable component architecture.
- Migrated legacy applications to React, TypeScript and Redux Toolkit, improving maintainability and development velocity.
- Reduced critical production issues by 40% through performance profiling, targeted refactoring and frontend optimization.
- Built complex dynamic forms with advanced validation logic; implemented accessibility (WCAG) and internationalization (i18n).
- Mentored junior developers and ran code reviews, maintaining engineering quality and team standards.

Full-stack Developer — SKA LLC

Oct 2020 – Apr 2022 · Moscow, Russia

- Designed the frontend architecture and built the corporate sales website and a CRM system for a state procurement platform, integrating backend APIs (Node.js).
- Delivered software supporting government contracts totaling $400K and ~$9K/month in online product sales.

Full-stack Developer — Istok LLC

Feb 2019 – Sep 2020 · Moscow, Russia

- Developed 4 production websites from scratch, covering both frontend and backend.
- Increased user engagement by 50% through UX improvements.
- Maintained and optimized existing web platforms.

Skills

- **Frontend:** React, TypeScript, JavaScript (ES6+), Next.js, Redux Toolkit, SolidJS, HTML5, CSS3, Material UI, Ant Design, Coherent Gameface (in-game UI)
- **Architecture & quality:** component-driven development, design systems, performance optimization, accessibility (WCAG), i18n, Jest, code review, legacy modernization
- **AI-assisted development:** Claude Code, Codex; agentic coding workflows, prompt engineering, AI-assisted refactoring, test generation and code review

- **Backend & data:** Node.js, Express, REST APIs, GraphQL (Apollo), PostgreSQL, Sequelize, Python
- **Tools & process:** Git, Bash, Agile/Scrum, mentoring

Education

Bachelor of Business Administration — Penza State Pedagogical University
